# Floribunda OR SWEETHEART ROSES

BETTY PRIOR (Pat. No. 340)

## BETTY PRIOR

(Pat. 340.) One of the best medium height roses for borders and beds. Plants are heavily branched and well clothed with fine foliage and produce large branching clusters of semi-double pink flowers. Makes a fine show for a long season. \$1.00 each.

## BRIGHT EYES

(Pat. applied for.) A lovely new floribunda rose producing a bright and gay display of bloom as the canary yellow buds open to good size double flowers. Light yellow to white petals deepen in color at the yellow center. Bush and foliage luxurious and healthy and literally covered with flowers. \$1.25 each.

## CECILE BRUNNER

Tiny flowers. Buds pink shaded to salmon. Always in bloom. This rose, with our Pasadena Tournament, Red Sweetheart and Lady Ann Kidwell are four of a kind; very different from the usual large flowered roses. \$1.00 each.

## CHATTER

(Pat. 739.) Velvety textured bright crimson flowers averaging three inch across cover the sturdy two-foot plants in great abundance. Add to this a delightful old rose fragrance and you will want this dwarf floribunda rose in your garden. \$1.25 each.

## CHINA DOLL

(Pat. 678.) Very dwarf Polyanthus rose making a dense bushy growth and literally covered with dainty double light pink flowers. The clusters are large and the habit so neat that it is one of the finest roses for a low flowering hedge yet introduced. \$1.50 each.

**Prices of all Roses in this catalog are for "Bare-Root" plants. Our Bare-Root season ends about April 1 and we can not accept orders for delivery by mail after this date.**

The beauty of this group of roses lies in the attractive display of bloom. Those of Red Sweetheart, Pasadena Tournament and Lady Ann Kidwell are borne singly on the stems and are therefore ideal for cutting. The flowers of the other varieties listed (true floribunda) are borne in clusters containing both open flowers and buds at the same time. No other group of roses will give as much bloom per plant as these little lovelies.

## CRIMSON ROSETTE

(Pat. applied for.) Flowers of medium size, fully double, borne in large clusters. They last an amazingly long time. Petals velvety red. Vigorous habit of growth with deep green heavy foliage which sets off the lovely flowers. Long flowering season. \$1.50 each.

## DENNY BOY

(Pat. rights reserved.) The best description of this new Marsh rose is that it is like a miniature Peace rose in coloring. The tiny and dainty buds are apricot yellow in color and open to yellow flowers which show pink on the upper half. As the flower fades it becomes rose red. Free flowering and dwarf. \$1.50 each.

## FLORADORA

## Epiphyllums, ORCHID CACTUS

One of the finest flowering plants for semi-shaded or fully shaded places. They are particularly fine when placed in containers suitable for hanging on the trunks of trees or against walls, such as wire baskets.

Epiphyllums are a showy group of plants with leaf-like stems sometimes jointed but most always long and arching. Sometimes they droop in a pleasing way to display the large many-petaled flowers which last several days each. The colors are bright, mainly in the pinks, reds and yellows with white and orange well represented. Many of the red-flowered varieties show light but brilliant blue casts in them and are very attractive.

The culture of these plants is reasonably easy. They like a well drained soil and controlled moisture. For this reason they should be planted in flower pots and kept on the dry side. The soil, a mixture of 1 part sand, 2 parts leaf mold and 1 part garden loam, is porous and spongy, yet well drained and holding sufficient moisture for the plants. Top dress in early spring with manure and later on about a month after the blooming season using any good commercial fertilizer. Although the soil should be moderately moist at all times the drainage should be quick and thorough. Epiphyllums are not desert cacti.

**Plants are offered as cuttings (rooted) which should be potted on arrival into 4-inch pots.**

PYRACANTHA DUVALI

### PYRACANTHA

Christmas season our eyes center on all red berries. Every kind on the market is being advertised and shown. Out of these, we prefer Pyracantha Duvali.

We have grown this variety and shown it here in Pasadena for the past ten years. We do not claim this to be the darkest berry, but it is the best **RED** berry and never fails to catch the eye. It is the biggest clustering berry—it has resisted all diseases.

It is not a berry birds will not eat. However, we have yet to find one that will not attract birds. But there is a distinction among berries. Pyracantha Duvali, although red, is not ripe until after Christmas. Being sour, the birds will not touch the berries until after Christmas, when they are ripened.

Beautiful plants in gallon cans—loaded with berries—at \$1.50; 5-gal., \$3.50. We ship express collect.

For delivery of well berried plants for the Christmas season be sure to place your order well before December 1. Shipping weight: gal. 12 lbs. Although we will use every effort to pack "berried" plants for safe shipment, we cannot guarantee safe arrival at destination.

In California they bloom over a long period but in colder climates give a light mulch during winter and enjoy their exquisite blooms in summer.

There is little reason for this since the newer varieties are real plants of merit. They require little attention after planting preferring a good soil and full sun. In cold climates the roots should be stored as for Gladiolus and Dahlias and planted again the following spring after danger of frost is passed. 4 for \$1.00, postpaid.

peach markings.

**Florence Vaughn.** Yellow with **Indiana.** Orange.

The leaves are long and narrow in nice clumps. Agapanthus is delightful when planted in colonies of several bulbs in partially shaded places where the blue flowers show up well against a dark green background, and is most effective if partial sunlight strikes the flowers. Shade is not necessary, it just prolongs the flowering season. Bulbs for shipping, 3 for \$1.50, postpaid. Available all year.

LADY ANN KIDWELL

PASADENA  
TOURNAMENT

## *Marsh's True Sweetheart Roses*

### **LADY ANN KIDWELL**

(Pat. rights reserved.) It is another Sweetheart type similar to Pasadena Tournament and Red Sweetheart but distinct in the shape of bud and open flower. The delightful long buds with gracefully pointed petals of rich pink to almost red in cooler weather will take your attention. These open to star-shaped flowers 3 inches across. It is equally good for cutting and the cut flowers last several days in water. Growth upright to about 4 feet and the free flowering habit and fine healthy reddish tinted foliage densely covering the plant make this a fine addition to our list of floribunda roses. \$1.25 each; 3 for \$3.35; 10 for \$10.00.

### **PASADENA TOURNAMENT**

(Pat. 578.) The name, "Pasadena Tournament," has a counterpart in the Tournament of Roses, the famous Football pageant annually held in Pasadena. From the small, dainty red buds come regular size velvety red flowers, literally bursting into a glorious pageant of rose beauty.

In the garden Pasadena Tournament makes a compact small to medium size bush. Well clothed in good rich green foliage. Since it is almost completely thornless, it can be used in masses close to walks without damage of torn clothing. Dainty in every way, it is best placed where it can be easily admired. \$1.25 each; 3 for \$3.35; 10 for \$10.00.

**See Our 16th Anniversary Collection Offer, Page 4.**

### **RED SWEETHEART**

(Pat. 577.) Carmine red buds opening to rose red blooms. The flowers are slightly smaller than those of Pasadena Tournament when fully open. In many ways the lighter color of Red Sweetheart is appropriate for many occasions where less color display is desired. The buds make exquisite corsages, boutonnieres. Small, daintier bouquets are delightful with Red Sweetheart.

In cooler weather the color is deeper and richer. Red Sweetheart in the garden will produce very well formed buds that are brighter than the popular florist's Sweetheart roses and the dainty, tiny buds, almost completely devoid of thorns are easily picked.

Bushes of Red Sweetheart seldom exceed 3 feet, more commonly 2-2½ feet in height, making a compact, neat bush. It can be planted in front of Pasadena Tournament for special effects. \$1.25 each; 3 for \$3.45.

### **CL. PASADENA TOURNAMENT**

(Pat. 797.) New. We are pleased to offer the climbing form of our Pasadena Tournament rose. It is really a climber with the same practically thornless habit and dainty deep red "Sweetheart" type buds which open to marvelous velvety textured flowers of fine form, high centers and with the same excellent keeping qualities so admired in the bush type. \$1.25 each; 3 for \$3.35; 10 for \$10.00.
